3. Introduction of the Federation of Thai Industries
4. Self-Introduction
5. Open Discussion
6. Closing Remarks
7. B2B Networking Session

MINUTES

- Nowadays, Egyptian public and private sectors underline the importance of Environmental sustainability in business. Therefore, businesses related to renewable energy and smart farming have an opportunity to grow in Egypt.
- Currently, Egypt is highly interested in agricultural industry, furniture industry, and fishing industry of Thailand because of the fact that Thailand has experts and specialists who are able to adopt technology and innovation in an attempt to advance the productivity and output. Furthermore, Thailand can also provide good quality products with an affordable price and advisory service to Egyptian entrepreneurs.
- Egyptian Businessmen's Association (EBA) suggested that the relationship between Thailand and Egypt should be strengthened through projects which aim to develop future collaboration, such as business matching and networking events, business trips, and seminars. By developing different forms of projects collectively, both Thailand and Egypt will receive mutual benefits, especially the increasing of trade and investment opportunities.
- Thai and Egyptian entrepreneurs from various business industries—including food, robotic and automation, and agricultural equipment— had opportunities to discuss and build networks through B2B Networking Session.
